

The PRIMA programme is supported under Horizon 2020 the European Union's Framework Programme for Research and Innovation.

We are very glad to announce the 1st

Joint Workshop of PRIMA projects IMPRESA and EXPLOWHEAT

“Facing abiotic stresses affecting durum wheat across the Mediterranean basin”

University of Tuscia, Viterbo (Italy), **February 21-22, 2022**

The event will bring together academic scientists, researchers and students to share and discuss with a wider audience current and emerging challenges (environmental stresses, reduction of arable land and water resources) which increasingly affect durum wheat security in Mediterranean countries

Because of mobility restrictions due to COVID-19 pandemic, the event will be open to public on February 21st, with the possibility to attend in person (Aula Magna, DAFNE - University of Tuscia, up to 50% of its capacity), as well as online through the link <https://unitus.zoom.us/j/94557498474>

The full program and updates can be found on the IMPRESA and EXPLOWHEAT websites:
