# **INDUSTRIAL PARTNERSHIP MEETING**

15 December 2022, Time: 10:00 - 13:00, CET On-line edition: Zoom®

Co-funded by the European Union

The EIT RawMaterials is a platform for innovation funded by the European Institute of Innovation and Technology (EIT). The EIT has created the so-called KIC - Knowledge Innovation Communities, communities that aim to promote innovation and education in Europe in crucial sectors, supporting entrepreneurship and enhancing the passage of new ideas from the incubation phase to the market. The EIT RawMaterials, which since 2016 has established one of its nodes in Rome, is particularly committed to addressing the global challenge of supplying raw materials in Europe through programs and projects that aim to develop technology throughout the entire value chain of raw materials: from the exploration of resources, to the mining industry, from metallurgical processes to the replacement of critical or toxic raw materials, from the recycling of end-of-life product materials to the design of products for the circular economy.

As part of regional development programs, the EIT RawMaterials has created a Hub in the Puglia Region, coordinated by ENEA, in order to increase the involvement of the local ecosystems in the activities of KIC and its partnership. The Regional Center Southern Italy (RCSI) will also aim at reaching new organizations and promote the participation of the most innovative industries, companies, SMEs, start-ups and spin-offs, as well as the involvement of the prestigious Universities and Research Centres in the RIS area including MSc and PhD students, researchers, scientists, professionals, innovators, entrepreneurs, managers.

The 1-day virtual *Industrial Partnership Meeting* represents a chance for a show-case of startups and innovative SMEs in order to exhibit the most recent innovations in the sector of the critical raw materials. Additionally, the meeting will be a milestone to know deeper the funding opportunities offered by EITRM with business support programmes (JumpStarter, Booster, Accelerator, KAVA Calls, etc.) to tackle the industrial and societal challenges of the raw materials in Europe. The Southern Italian stakeholders (start-ups, spin-offs, SMEs, companies, research groups, university students) are highly welcomed to boost the RCSI community.
